

Committed to ensuring increased participation of women and the visually impaired in the 2023 General Elections, the Gender and Inclusivity Department has been mobilizing the identified sidelined groups in Anambra, Enugu, Gombe, Yobe, IMO states among others to make accurate and informed choices. Consequently, its staffers are in the states to provide information on the side effects of vote trading and violence through Town hall meetings, urging women to teach your children to contribute to peaceful elections even as they shun vote trading.
